

SUCCESSFUL COLLABORATION

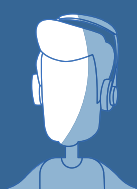

Humans first Technology second

RETHINKING THE ORGANIZATION

Collaboration is, first and foremost, a change in attitude and behavior of people throughout an organization.

To be successful, organizations need to throw out old notions and understandings about their employees.

THE NEW WORKFORCE

Millennials are projected by 2020 to make up 50 percent of the workforce

88% associate a connected culture with their "dream job"

87% want technology that contributes to their personal growth.

PET PEEVES

- Wasting time searching for documents
- Having to hunt for specific information about a project or task
- Trying to find my co-workers contact details

RECOGNIZING CHANGE

According to Harvard Business Review :

72

PERCENT

of business leaders say "effective team communication" has become more important over the past two years.

64

PERCENT

report that collaboration has increased in importance within their organization
